Profile

Objective

To leverage my technical expertise and problem-solving skills in a dynamic software development environment, contributing to innovative projects and driving organizational success.

Projects

Library Management System

- Developed a web-based application to manage library catalogs and borrower information using HTML, CSS, JavaScript, Java servlets, and JSP.

Food Delivery Management System

- Created a platform using React and Spring Boot for a seamless user experience in exploring, choosing, and ordering meals. Implemented user and admin panels with functionalities such as registering, logging in, searching, ordering, and managing restaurants and menus.

I am a highly motivated individual with a PG Diploma in Advanced Computing (PG-DAC) and proficient in a wide range of programming languages and technologies including C++, CSS, GitHub, HTML, Java, JavaScript, MongoDB, MySQL, PostgreSQL, React JS, and Spring Boot. I possess strong communication and interpersonal skills, allowing me to effectively collaborate with team members and stakeholders. I am eager to leverage my technical expertise and interpersonal abilities to contribute to impactful projects in the field of software development.
